## COYOTE TRACKS-

News And Comment Of The Schools By the Students and Faculty

### MORE TEACHERS

The Phoenix high faculty has had an addition to its numbers in the person of Miss Clara Salmons, the younger sister of Miss Clara Salmons, the present Spanish teacher. Miss Salmons (the new one) has been a substitute the first three days of the week for Miss Brown, the first year Spanish teacher, who went to Tucson to graduate in Spanish. Miss Salmons has also taken charge of Mrs. Cook's algebra classes for the rest of the year, and has now taken charge of the fifth hour study hall.

Mrs. Cook has been called away on account of the illness of her mother. Mrs. Cook has proven an excellent algebra teacher and has also taken charge of the fifth hour study hall. All are sorry that Mrs. Cook's mother is ill and that she is called away for the rest of the year. At the same time all are glad to have such an excellent teacher as Miss Salmons to take Mrs. Cook's place for the rest of the year.

### GREAT POETS

Friday it was discovered in the Junior English classes that old Phoenix high had some real poets. This time is the first in the year that Mr. Stauffer, the present English teacher, has taken up poetry and as he has turned out some fine short story writers, it is absolutely certain that he will turn out as many good poets. The poems this

week were taken from poems written by famous poets in American literature to get the students more familiar with the writer, etc. Next week, the poems will be original and it is expected that many will be very fine. This poetry work will make it possible to have a fine class poet next year. Here's hoping a good one is found.

### COACH GEARY

Francis Geary, the coach who has led the track and football teams to victory in the past, will be with the school next year to lead the teams again. He has produced such athletes as Ed. Brock, Merhar and Peabody who have won fame in college or made records that are unbeatable at Tucson. Every year Geary takes a bunch of high school boys and before he is finished with them they are finished athletes.

The second tennis team cancelled its game with the Tempe normal because the normal boys are very busy getting their cadets in shape.

### SENIOR PLAY TICKETS

Tickets are on sale now for the senior play. The reserve seat board will open Tuesday morning at 8 o'clock at Vic Hanny's Clothing store. Thursday night Miss MacAfee sent the cast through the entire play with

## M'ARTHUR BACK FROM FACTORIES

Warren McArthur of McArthur Brothers has returned from a hurried trip east which included visits to the Dodge, Packard and Nash factories. Mr. McArthur states that from the viewpoint of bankers, dealers and manufacturers, the war situation will have little effect upon business in fact all lines of business are pushing ahead and plans made by the Packard Motor Car company, last fall for the production of this year of 20,000 "Twin Sixes" and 1,000 trucks per month, will be carried out as though there were no war.

"I was much impressed," said Mr. McArthur, "with the courage and faith of the large motor companies in planning their production increases so far in advance 'betting' as it were, on even better and more prosperous conditions to come, as the output of factories, which cars is consistent throughout the United States and the question of deliveries through shortage of freight cars has been serious, although at the present time is getting better."

The Nash Motors company of Kenosha, Wis., who make the Jeffery pleasure cars and "Quad" trucks, will produce 25,000 cars this year against 18,000 last year. W. W. Nash, formerly of the General Motors company, is at the head of this company and has gathered a staff of department heads who are famed in the motor world for their ability and the Nash Motors company is fast pushing ahead to be one of the largest manufacturers of motor cars and trucks in America.

McArthur Brothers have been somewhat handicapped by non-delivery of cars in the past sixty days, but Mr. McArthur succeeded in making arrangements on this trip that will enable them to make immediate deliveries, which will be good news to the many who have been waiting for cars.

all change of scenery. Every member of the cast seems to have a natural fitness for their part which will enable them to give the public something extraordinary in amateur productions.

Ira Mae Golze will shine in her part as Betty Dearborn. She has the lead and is herself a natural born leader. Donald Hult will play opposite her in the role of a Puritan minister. He is the right man for that place. Each individual is striving to do his or her part to perfection and with that prevailing spirit only the best can result.

### CLASSES WILL DISBAND

The chemistry classes took their final examination yesterday. Monday they will report to the study hall. The first and second hour class will not be present to come the first hour. The reason for this is that Mr. Jones, who has volunteered, will be leaving us some time next week. The classes have finished the course in the book and nothing will be lost by their having no chemistry for the last three weeks.

### BIOLOGY PICNIC

Mr. Carpenter's first and second hour biology classes indulged in a moonlight picnic Friday evening. The students went by auto to the Hieroglyphics where they had a fine time for several hours.

The classes make frequent trips to the desert for nature study. On their last trip several interesting specimens were secured, among which was a five foot rattlesnake.

### COYOTE NOTES

Professor Elliot gives his classes more freedom this year. He lets them make their experiments and take notes as they do in college so that they will get used to depending on themselves.

Miss Wilkinson is going to give her final exams before the regular time because she has so much work to do in the library before the end of school.

## BURGLAR GIVEN TERM OF YEARS

Edward R. Thomas, the "New Year's Night Burglar," was sentenced to a term of not more than ten nor less than six years in the penitentiary at Florence by Judge Stanford yesterday.

Thomas whose series of burglaries terrorized the fashionable residence district during the holiday season pleaded guilty to the charge of burglary before Judge Stanford. While he stated that he had accomplices he refused to implicate his former confederates.

Several thousand dollars in jewelry, furs and clothing were stolen by Thomas from the Harry Kay residence. Theft of diamonds from Leon Clares in another crime credited Thomas.

## MRS. BUTTS OUT ON BAIL BOND

Mrs. Ethel Butts, wife of Floyd Butts, charged with assault with a deadly weapon with intent to commit murder, was released yesterday afternoon on \$3,000 bail presented by her attorney F. Louis Zimmerman.

Mrs. Butts, who has occupied the women's cell in the county jail since shooting her sister-in-law, Mrs. Charles Butts, over a week ago, was removed to a local hotel. She was taken from jail by her attorney and her mother Mrs. M. A. Hanks, who has been allowed by the county to remain at her daughter's side. Mrs. Hanks arrived from Texas immediately after learning that her daughter had been accused of crime.

According to Dr. Win White, Mrs. Charles Butts is very ill. He holds out no hope for her recovery.

## CORRECTION IS APPEALED FOR

Eager that their children should have educational advantages, two mothers appealed to county probate officer W. J. Osborn to reprimand

their sons in such a way that they would not dissent themselves from their studies.

"I am tired trying to make him go to school," said the mother of Richard Fordillo.

"I can't keep him in school," echoed the mother of David Pough.

As a result of a conference with Mr. Osborn it was agreed to send the boys to the Detention home for two days. Yesterday the women called at the Home for their sons. They had no order from the probation officer and the boys were refused them.

"What will we do," they implored

of both Judge Stanford and Judge Lyman who could in turn only refer them to Mr. Osborn, who chanced to be ill and at home.

After passing hours tearfully appealing to one official after another to whom they confided their troubles, they managed to reach Mr. Osborn by telephone. When the officer learned that by holding the boys prisoners over Sunday they would be unable to call the big morning daily he agreed to let them off for a few hours.

Final disposition of the case will be made on Monday.

### Report of the Condition of CITIZENS STATE BANK

At Phoenix, in the State of Arizona, at the close of business, May 1st, 1917.

RESOURCES

## See the 31 Features Most Other Cars Omit

Mitchells differ from other cars in a hundred ways, particularly in these respects:

31 unique features—  
24 per cent added luxury—  
100 per cent over-strength.

These extra attractions are due to John W. Bate, our famous efficiency expert. They are his additions, paid for by savings which his factory methods create.

Come see how much these extras add to a car you buy to keep.

Cost Us \$4,000,000

Most cars omit these extras because of the added cost. The cost to us, on this year's output, is about \$4,000,000.

On Mitchells we save this by factory efficiency. And we spend it on extra values.

Take our power tire pump, for instance. Everybody wants that. So with our reversible headlights, our dashboard engine primer, our ball-bearing steering gear.

So with our never-broken cantilever springs. So with our tonneau light, our locked compartment, our handles for entering. So with our added luxury and our over-strength.

Every extra in the Mitchell is something that you want.

### They Are Free

If Mitchells were built in an ordinary factory, such cars at our prices would be impossible.

But John W. Bate built and equipped this plant to build this one type economically. He has spent millions of dollars on efficiency methods, to cut our factory cost in two.

This year our new body plant adds another big saving. And that pays for our added luxury.

It is this model plant, with its more than 2000 up-to-date machines, which gives you these extras free.

### Our Biggest Extra

The extra features and the extra beauty are the most conspicuous attractions.

### TWO SIZES

Mitchell—a roomy, 7-passenger wheelbase and a highly-developed 48-horsepower motor.  
Price \$1585 Phoenix

Mitchell Junior—a 5-passenger similar lines with 127-inch wheelbase and a 40-horsepower motor—4-inch smaller bore.  
Price \$1275 Phoenix  
Also six styles of enclosed and convertible bodies. Also new Club Roadster.

But the greatest, in the long run, is our 100 per cent over-strength. In the past three years, John W. Bate has doubled our margins of safety. Every vital part now has twice the needed strength.

Over 440 parts are built of toughened steel. All safety parts are over-size. We use a wealth of Chrome-Vanadium.

Several Mitchells have already run over 200,000 miles each. In two years not one Bate cantilever spring has broken. Those are some results of this over-strength.

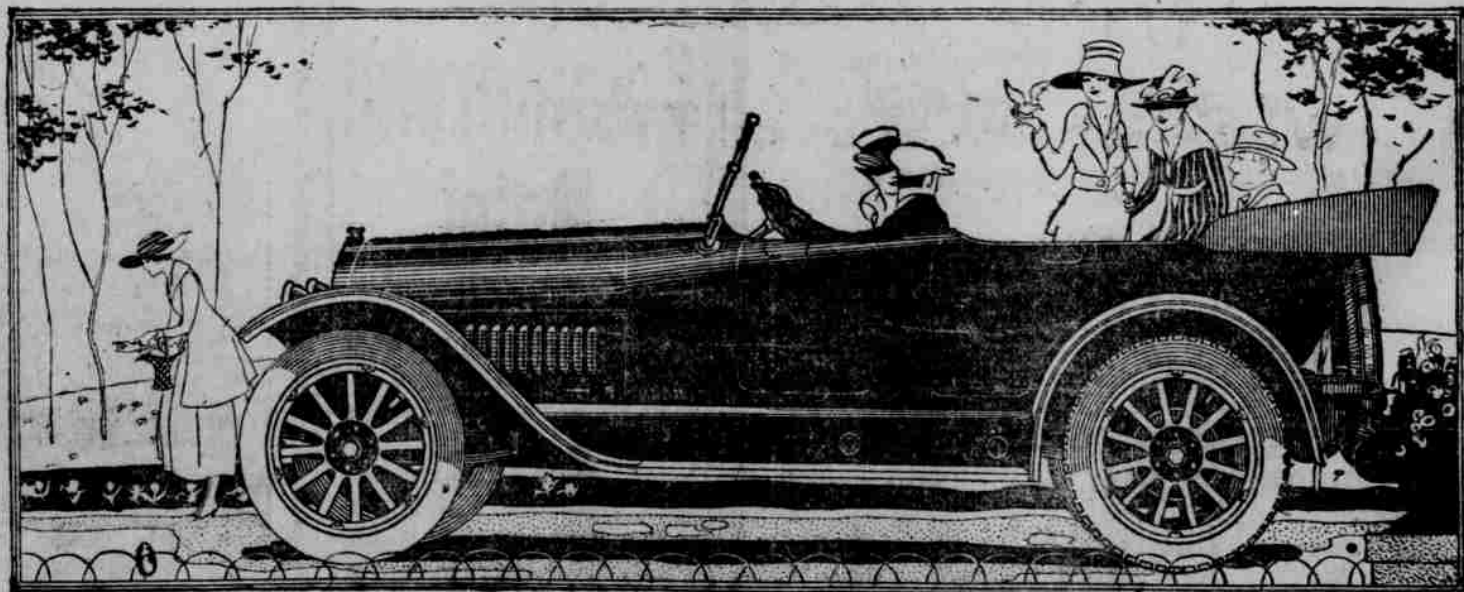

### Now an \$1275 Size

And now we have two sizes—Mitchell and Mitchell Junior. Both are Sixes, both are roomy and powerful. Even the smaller car has a 120-inch wheelbase.

You have never seen such values in fine cars. You have never seen cars so equipped. You have never seen, in the Mitchell class, such finish, such beauty, such luxury. You have never seen, at Mitchell prices, such vast over-strength.

Come and confirm these facts. Come now, because there is bound to be a shortage. In spring, the Mitchells are always oversold.
